**Plagiarism infographic transcript**

This simple flowchart was created by EasyBib. The chart provides a way to quickly check to make sure you aren’t plagiarizing. It also helps students decide whether or not they need to use citations.

The chart starts off with the question:

- “Are my own words being used?”
  - If you answer yes, it goes on to ask if it is your idea or not.
    - If you answer yes, then it is not plagiarizing; if you answer no, then you are paraphrasing therefore you are plagiarizing and would need citations.
  - If you answer no, it goes on to ask if you are using quotations.
    - If you answer yes, then you are not plagiarizing; if you answer no, then you are and you should go back and quote it.
